ABOUT ME

I am a self taught Web Developer looking to expand my skills and knowledge. I developed my experience through a combination of self-led study (watching videos and reading articles) and online courses. I am a fast learner and critical thinker with a growth mindset.

I am currently working with JavaScript and React. I have got experience building web applications with responsive landing pages and enjoyable UX/UI. A former physics student at the University of Nottingham who enjoys the problem solving side of things.

EDUCATION

ACHIEVEMENTS

Code First Girls, Remote
MAY 2020 - JUN 2020

Designed to teach women from different backgrounds how to code. I learnt the basics of web development and work within teams of 4+ people with the goal of building a fully responsive website by the end of the program. The program taught different ways of thinking and planning – for example using wireframes to rapidly prototype designs. As the team leader I was responsible for assigning different tasks to team members as well as setting deadlines.

Web Development, Codecademy.com
APR 2020 - JUL 2020
Learning platform that provides the most up to date knowledge of the technologies for full stack web development. In this path I was taught about HTML, CSS and JS whilst building complex projects. I was also introduced to Git/Github, React, Node, Express, SQL and TDD with Mocha.

WORK EXPERIENCE

University of Nottingham, Nottingham: *Social media adviser*
NOV 2019- JUN 2020
Developing the social media platforms of the Students Careers and Employment Services at the University of Nottingham. I was working with a team of three people analysing and finding better ways of delivering excellent and engaging content for the students in the university.

Farmacia Cinco Caballeros, Córdoba, Spain : *Lab Assistant (internship)*
SEP 2019-OCT 2019
Working as a laboratory assistant in an important pharmacy that provides supplies for most of the communities in Spain. I was introduced to new ways of making tablets, capsules, serums, stock solutions and other important substances that were used for bigger products. I learnt how to work independently in an unknown environment, communicate effectively, make accurate products and analyse the errors made by myself and other colleagues.
